Project Brief

> Requirements of the site:

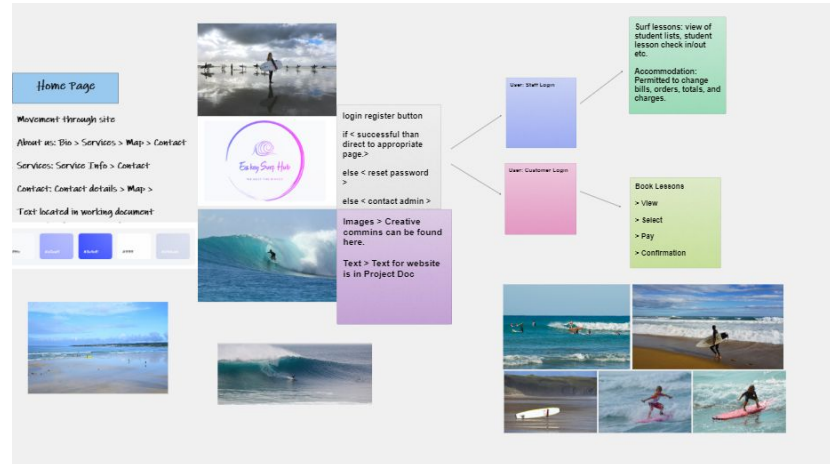

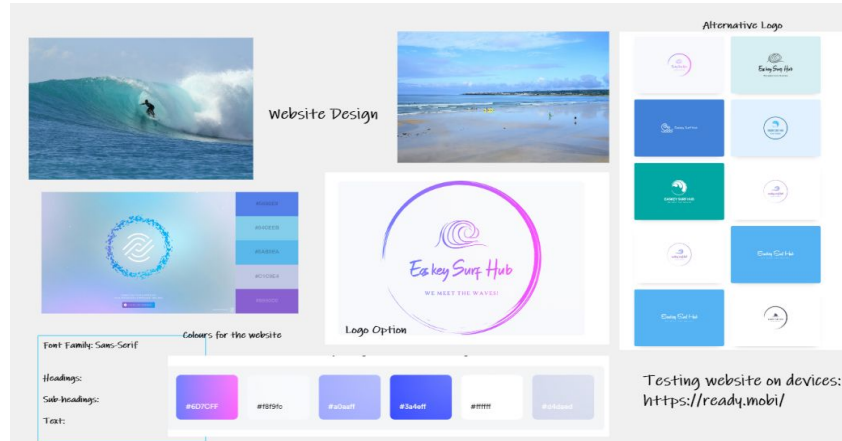

> **Two Users: Customers & Staff**

- > Provide information about the surf school, including info on lesson times/ accommodation.
- > Allow customers to: view, select, pay & manage bookings.
- > Allow staff to edit information (inc. lesson times), checkin/out of lessons.

The Website

Our Client, Hank Flavin is a former USA junior surf champion. His experience sets him apart and so we wanted the website to reflect this, clean, simple and allowing customers to view all that Easkey Surf School has to offer.

“The increased interest in surfing in Ireland, coupled with an unbelievable coast line provides huge commercial opportunities along the Atlantic Way.”

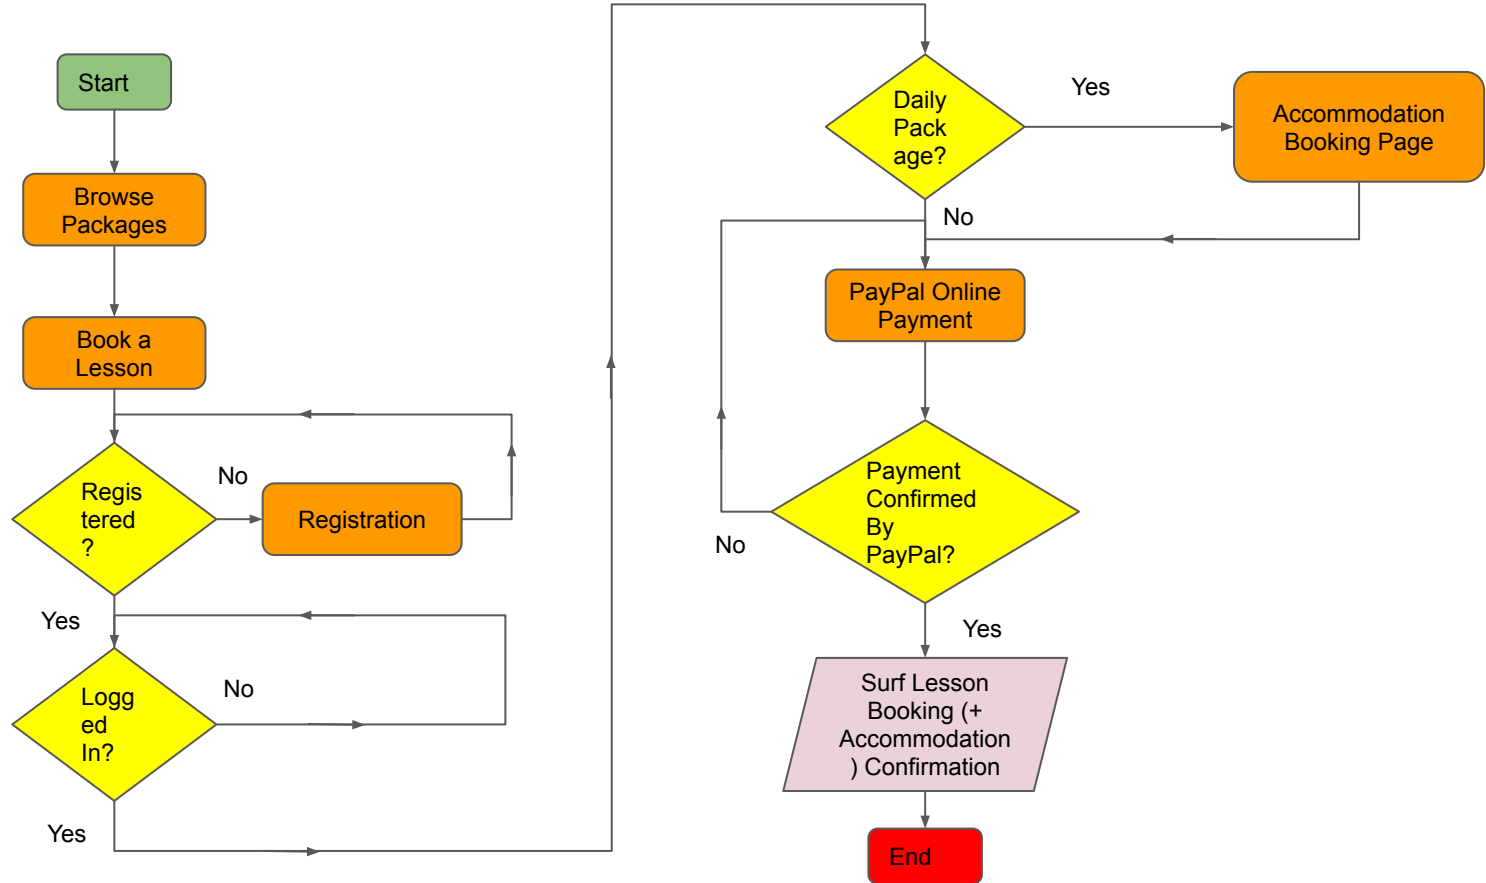

Benefits of online surfing website to the customers

Color Codes

- Features
- Conditional Operations
- Display

Benefits

- Online visibility
- Online Registration
- Online booking
- Accommodation
- PayPal Payment

Link issue

Description

Acceptance criteria:

- Positive outcome:

Given that the customer clicks on the registration link and redirects to the registration page.

when customer enters valid customer details(first name, last name, username, password, mobile number.)

Then customer registration will be success.

Projects /  SurfSchoolProject / SUR-2 /  SUR-23

- Negative outcome :

Given that the customer clicks on the registration link and redirects to registration page.

when customer enters an invalid customer details(first name, last name, username, password, mobile number.)

Then customer registration will be failed.

- Negative outcome :

Given that the customer clicks on the registration link and redirects to registration page.

when customer enters the customer details(first name, last name, username, password, mobile number.) which already exist in the system.

Then customer registration will be failed.

Gayathri Sangavi

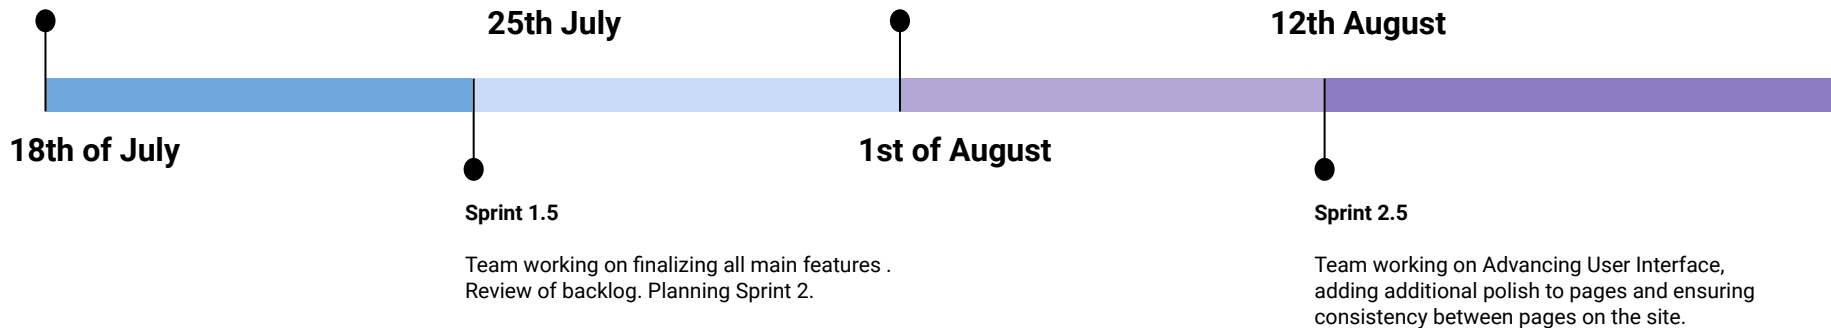

Project Timeline

Sprint 1

Team working on Prioritised Tasks in the backlog. Focus on establishing key features including Registration, Main Product Page

Sprint 2

Team working on Secondary Pages, login page, payments portal, Staff Admin, etc.

Conclusion

This project requires the development of a website with the following:

- > About/ Products page
- > User Login System
- > Online Payment (paypal)
- > Editing functionality (separate requirements for Staff/ Customers)

Thanks for listening patiently, we will now answer any of your questions!
